REPLY TO
ATTN OF:

BSTKB

4 FEB 1963

SUBJECT :

Distribution of Titan Contractor Data and Reports

TO:

Distribution

1. Effective 1 April 1963, the Technical Data Center (TDC), Hq Space Systems Division, Los Angeles 45, California will discontinue their distribution of BSD contractor data and reports. Effective the same date and thereafter initial distribution will be made directly from the respective contractors.
2. To implement the change, this SPO is required to develop detailed contractual direction to those contractors for which we have prime responsibility, i.e., Martin Company, Ralph M. Parsons, Paul Hardeman and American Machine and Foundry. A critical review, therefore, of distribution requirements is timely.
3. Attachment 1 reflects the current TDC distribution to your activity of Titan I and Titan II data and reports from the above named contractors. Your continued receipt of data from these four contractors is dependent upon your action as follows:
 - a. Review the attached distribution list and determine your continued need for data and reports currently being received.
 - b. Submit specific justification of your need for each series of data and/or reports which you determine as still required. Distribution will be approved only for those activities which show a pertinent need for the data requested.
 - c. Attach to your return justification a separate list showing data title, originating contractor, name and/or mail symbol of each recipient, complete mailing address and number of copies required.
 - d. Forward your reply to BSTKB (Lt James, ext 8466) by 1 March 1963. No reply by that date will constitute deletion of your activity from present distribution.
4. Your cooperation in furnishing us with your minimum essential requirements promptly and accurately in accordance with the above instructions, now and on a continuing basis as changes occur, will help greatly to assure efficient and uninterrupted distribution service.
